Pickfords Removals  
PO Box 5253  
Durban  
4000

**Letter of Recommendation**

**Airport Transfer Project, King Shaka International Airport, Durban, South Africa**

As project managers of the King Shaka Airport Transfer Project, we confirm that we selected Pickford to relocate the overall majority of the furniture, fixtures, documentation and equipment from the old Durban International Airport to the new King Shaka International Airport, approximately 57km in distance.

Pickfords was responsible for the relocation of 14 ACSA Departments and the majority of the airport stakeholder companies, with an overall estimated total volume of over 100 thousand cubic feet of inventory. This was carried out over a 1 month period preceding the opening of the airport on the 1<sup>st</sup> May 2010. The Airports Company of South Africa imposed an extremely high risk profile on the project from a time, cost, potential damage to equipment and ultimately a reputation perspective.

Pickfords carried out their duties in a highly professional, organised and efficient manner; meeting every deliverable on time, on budget and damage free. Focus Project Management can confirm the project was an overall success and is proud to have partnered with Pickfords in such a momentous project.

Yours faithfully

Russell Chappé
